SKILLS

Languages: Ruby, Javascript, HTML, CSS, RSpec, JQuery
Web Frameworks: Rails, Sinatra
Database: Postgres, SQL, ActiveRecord, Firebase
Software: Git, OSX

PROJECTS

[Go Park Yourself](#) | Rails application that returns parking regulations and sends reminder based on user GPS. Worked on team of five, focusing on backend, taking data from Socrata and NYC Open Data and configuring with Google and Bing Maps API to create meaningful data for user.

[Don't Panic](#) | Chrome extension with Firebase that lets students request DBC coach assistance in real time. Learned basics of Firebase and built Firebase cloud backend. Context was Hackathon in DBC January 2015.

[256](#) | Front end javascript clone of the game 2048. Built out core logic of game.

[Meditation Trainer](#) | Javascript front-end only app that lets a user record breathing exercises. Co-designed MVC structured code and engineered pythagorean color rigging. Deployed to Heroku.

[Manito Secret Santa](#) | Sinatra application that lets users create and participate in secret santa exchanges and create wish lists of items. Worked on back end and deployed app to Heroku.
